

# MODERNIZE YOUR PROVIDER DIRECTORY STRATEGY UTILIZING AI.

Automate accuracy checks on your provider directory to meet compliance requirements.

## Veda Quantym—Data Quality Scoring

Quantym provides a full analysis of your entire provider directory database. Our patented technology will reconcile and provide recommendations to update, remove or add practice locations and related demographic information along with provider credential validation to ensure regulatory compliance.

## CASE STUDY: QUALITY

Mid-Atlantic Blue

National health plan received a CMS audit and scored 43% data accuracy. Hiring 20 people to manually fix the data would cost an additional \$1 million+.

## RESULTS

- ✓ 97% improvement in network accuracy
- ✓ 95% average data accuracy in CMS audit fields
  - + Accuracy threshold guaranteed in contract
- ✓ Significant savings in operational cost
  - + FTE cost avoidance savings
  - + 20% reduction in direct mail and call center costs
  - + 10% Non-par payments resolved to par providers

## VEDA GUARANTEES

- Data accuracy SLAs reported monthly
- Technology solutions tailored to your business and process requirements
- Consistent, comprehensive implementation and support structures
- <24hr ETL turnaround time process and delivery

## WHY VEDA?

Veda's Smart Automation is unique—our human-in-the-loop technology evolves manual processing workflows and quickly delivers accurate data, guaranteed. Tailored to solve the complexities of your data needs, Veda provides:

- ✓ Automation of provider roster intake
- ✓ File standardization
- ✓ Real-time data validation
- ✓ Data accuracy updates and more

Schedule a sample directory review and discover how you can improve your provider directory accuracy, and maintain compliance. [www.vedadata.com/demo](http://www.vedadata.com/demo)
